

COVID-19 is now categorized as a Class 5 infectious disease

From May 8, 2023

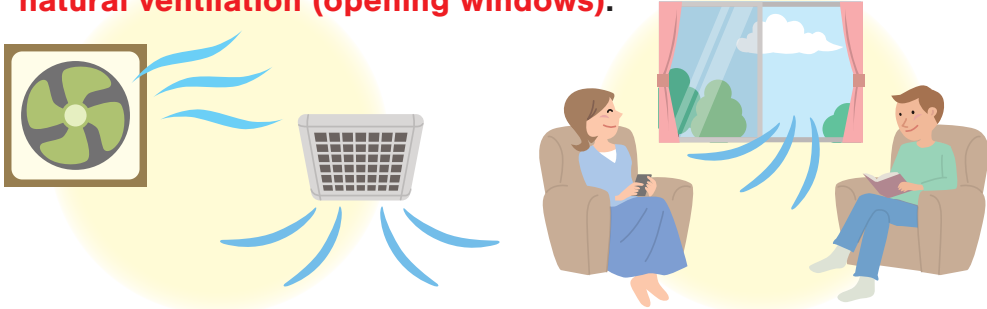

Implementation of infection control measures is left to the judgment of individuals and of businesses

..... The following measures are still effective

Ventilation

●Ventilation methods include **mechanical ventilation (24-hour ventilation system or exhaust fan)** and **natural ventilation (opening windows).**

**Hand washing
Hand sanitizing**

Wearing a mask

●In the following situations, wear a mask to prevent infecting those at high risk of becoming seriously ill.

When visiting a doctor, medical institution, or elderly care facility

When taking a crowded train or bus, such as during rush hour

*May be asked to wear a mask at the discretion of a business operator.

- ◆ If you are symptomatic, avoid crowds and wear a mask when going out.
- ◆ Consider having COVID-19 antigen test kits, fever medication, and other daily medications in advance.
